

Civil Engineering Technician / CAD Designer

Kiowa Engineering Corporation is looking to hire a Civil Engineering Technician / CAD designer with two (2) years or more experience in Civil3D drafting and design, to join our Littleton, Colorado office. Kiowa has a long-standing reputation building relationships with our employees and clients, which has allowed us to serve the Colorado front range for over 35 years. We are a small firm offering a variety of challenging civil engineering projects including public and private site development, infrastructure design, drainageway and storm sewer system design, floodplain modeling, stormwater quality and detention design. Our company has a professional, yet flexible work atmosphere with excellent employee benefits. We feel these attributes have led to a high level of employee satisfaction and longevity.

The applicant should have:

- High level of experience and knowledge with Civil3D software.
- Experience preparing civil construction plans including civil site plans, site grading, street and utility plan and profiles using Civil3D.
- Preparation of civil engineering plans and documents for a review to a city and/or state.
- Strong Attention to detail skills (organizational, time management, analytical thinking, observation, and active listening) and working efficiently.
- Maturity and self-motivation to work with a project manager/engineer and to work independently on preparation of plan sheets and design.
- Excellent timely communication skills.

Benefits

- Employer Paid Health and Dental Insurance
- Employer Paid Life Insurance
- Paid Time Off
- Flexible Schedule
- Retirement Plan – 401K with employer matching
- Professional Development Assistance

Salary to be determined based on the experience of the selected candidate (Range \$28/hr – \$36/hr).
